Course content:

The training course "Plasma School for Semiconductor Manufacturing: Plasma Technology for III-V Semiconductors" includes the following topics:

- Motivation
- Solid State Physics Fundamentals
- Compound Semiconductor Devices
- Thermodynamic and Chemical Properties of III-V Semiconductors
- Plasma Etching: Chemistry, Selectivity, Profiles, Roughness and Damages
- Surface Cleaning, Surface Treatment and Dielectric Deposition
- Most Critical Processes for Each Application
- Commercially Available Tools

The course is held in German and the handouts are in English.

Further information available on our [website](#).

The following services are included:

- Comprehensive training materials in printed form, in English
